Instituto Ítalo-Argentino Dante Alighieri

## SUMMARY

*I am a business administrator with 10 years of experience, who has always been interested in the field of data. A few years ago I discovered Python and all the cool things you could do with it, and it seemed like a nice addition to my career. I dedicated myself to studying data analysis with Python, and now I am studying data science, with the idea of doing a master's degree in the next few years.*
